

DEF / AdBlue® Inline Filter

The DEF / AdBlue® Inline Filter prevents damage to expensive downstream components, reduces equipment maintenance costs and prevents downtime.

THE FEATURES YOU NEED TO PREVENT DOWNTIME

Extended Service Intervals

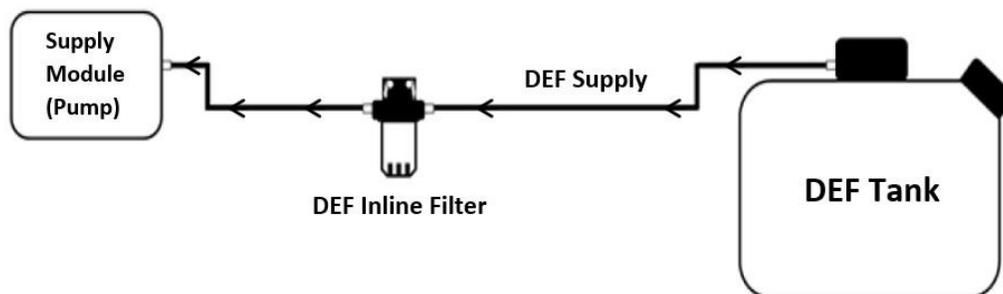

- 5 times more capacity than traditional in tank DEF filter
- 40 and 20 micron nominal filtration standard size, other sizes available upon request

Cold Weather Options

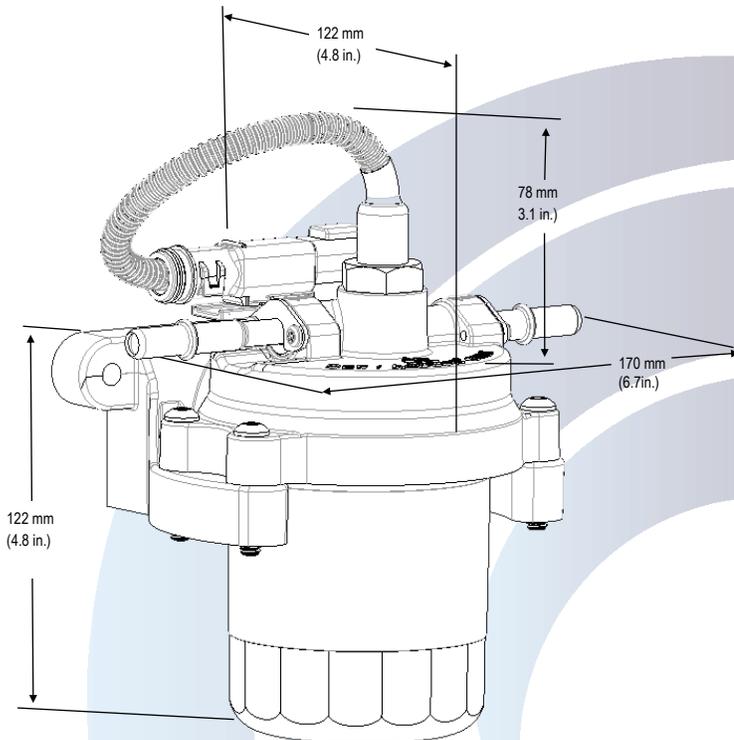

- Integrated Electric Heating with 12 to 24 V DC capability
- Automatic thermal control to prevents overheating the fluid
- Coolant heated version also available

Simple Integration

- Positionable mounting bracket allows for orientation in either flow direction.
- SAE J2044 fluid connections
- 2 pin Deutsch electrical connection

Making Fluid Function

All material compatible with AdBlue®/DEF & Diesel fuel

ORDERING NUMBERS		
HEATED - 40 Micron		
PART NUMBER	INLET FITTING SAE J2044	OUTLET FITTING SAE J2044

REPLACEMENT FILTER ELEMENT CARTRIDGE - 40 Micron		
PART NUMBER	ORDER QUANTITY OPTIONS	
DFC2-404-10-01	SINGLE (1) CARTRIDGE	
DFC2-404-10-18	EIGHTEEN (18) CARTRIDGES	

TECHNICAL DATA

FILTER TYPE	OPERATING TEMPERATURE	WORKING PRESSURE RATING	FLOW RATING	POWER CONSUMPTION (steady state)	PARTICLE REMOVAL EFFICIENCY
HEATED	- 40 to 75 °C	- 500 to 500 Mbar	30 Lph @ 10 mBar ΔP Unloaded (0 gm) 30 Lph @ 25 mBar ΔP Loaded (50 gm)	< 10 amps	≥ 98 % at 40 μm
NON-HEATED	15 to 75 °C			N/A	

THAW PERFORMANCE

The electric heater has the capacity to thaw a full and frozen (- 25 °C) filter cartridge (bowl assembly) to enable dosing within 20 Minutes of power on.

When full and frozen at (- 40 °C) the electric heater has the capacity to thaw and enable dosing within 40 minutes of power on.
