

Lift & Turn Composite Cap

All Shaw caps feature non-rotating seals which last the life of the vehicle

Key Features

- Locking design with standard padlock or built-in keyed lock
- Rollover safe meets 70-221 EED
- Leak tight during side slope and extreme operations
- Compatible with diesel fuel, hydraulic oil and most service fluids

Operation

- The lift and turn design handle offers simple one hand operation. To remove the cap, raise the handle, turn it counterclockwise and lift the cap off of the adapter.

General Specifications

- Manufactured from impact resistant robust composite materials
- Fits many standard 100mm OD filler necks or bolt-on, threaded or welded adapters
- Does not allow water to enter tank from outside sources such as rain or vehicle wash downs
- Use with filler nozzles up to 2.75" diameter

Available Options

- Custom logos, symbols or colors
- Custom filtration ratings
- Venting - Positive, vacuum, non-vented or any combination
- Standard cap design can be modified to meet customer specifications.
